## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation “with regard” is indefinite as to which method steps are being claimed.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by European patent document (1283290).

As indicated the European search report, European patent document (1283290) teaches the knit method as claimed including multiple tubular portions knitted and collected, using a flat-knitting machine comprising at least one pair of facing needle beds that extend in the sideways direction and face each other front to back, wherein at least one of the facing needle beds is capable of racking in the sideways direction, and the flat-knitting machine is capable of transferring stitches between facing needle beds; wherein; the tubular portion with directionality

toward a predetermined tubular portion is turned by a predetermined amount by transferring of stitches of the tubular portion with directionality and by racking of the needle bed, in which the stitch of the tubular portion with directionality that is farthest from the predetermined tubular portion is transferred so that the tubular portion with directionality turns into the predetermined tubular portion, following which knitting is performed so as to link the tubular portion with directionality to the predetermined tubular portion in a state wherein the state of being turned is sustained; so as to shape the overall shape of the tubular fabric to match the configuration of a body.

***Allowable Subject Matter***

Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
